## Installation instructions for PQRM Stand-Alone Version 5:

CTLAB

- 1. After downloading the Stand-Alone zip file from our website, right click on it and select "Extract All", or if you have WinRaR installed, select "Extract files".
- 2. In the destination bar, type C:\PQRM and click on "OK or "Extract"
- 3. Now navigate to you C drive or Local Disk which is found under My Computer.
- 4. Once in your C drive, navigate to the "PQRM" folder.
- In the PQRM folder, scroll down towards the bottom and you will notice two EXE files (PQRM.exe and PQRM-AR.exe) right click on each of them respectively and select "Send To" and then "Desktop (create shortcut)".

 Now go back to your desktop, and you will see two shortcuts named "PQRM.exe – Shortcut" and "PQRM-AR.exe – Shortcut"

- 7. Right click on "PQRM.exe Shortcut" and click on rename, now type "PQRM" and press enter. Now right click on "PQRM-AR.exe Shortcut" and type "PQRM Autoretriever" and press enter.
- 8. You now have shortcuts to both PQRM and Autoretriever on your desktop.
